

### Unsurpassed performance from the industry's leader in automatic sanitizing of large residential and commercial pools

Rainbow high capacity feeders from Pentair Pool Products sanitize large residential and commercial swimming pools using either chlorine or bromine tablets or sticks. These heavy duty, high capacity feeders provide automatic sanitization for pools up to 332,000 gallons. They operate by adjusting the pressure which circulates water through the feeder. They are designed for off-line hard plumbing installations using 1-inch PVC pipe and are available in three sizes.

#### Standard features include:

- Heavy duty control valve for accurate feed rate adjustment
- No special venting required
- Completely enclosed system—no escaping fumes
- Easy access for recharging and servicing
- NSF listed

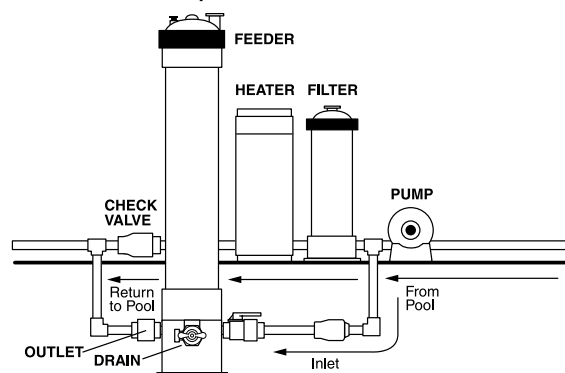

# Rainbow

## High Capacity Chlorine/Bromine Feeders

The performance leader in automatic sanitizing for large residential and commercial pools

### Additional Features Include:

- Designed for ease of use and simple maintenance
- Drain valve allows easy draining for safe recharging or winterizing
- Standard threaded inlet and outlet fittings included for easy installation

### Off-Line Feeder Installation

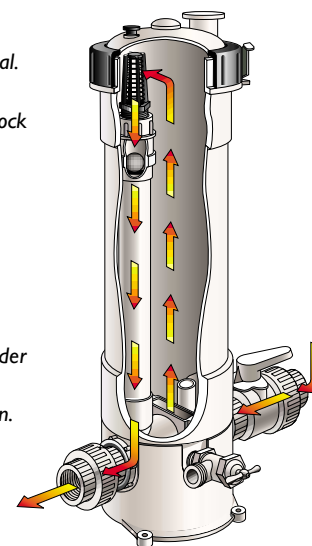

The INLET control valve side of the feeder connects to the plumbing on the discharge side of the pump, before the filter. The OUTLET side of the feeder connects to the pool return line after the filter and/or heater, pool cleaner, diverter valves, or any other installed equipment. Installation of a corrosion resistant check valve such as Pentair's #R172288 between the feeder inlet and outlet and the equipment is recommended to check backflow of chemicals. This helps ensure equipment longevity.

### Models & Specifications

Model	HC3315	HC3330	HC3340
Part Number	R171215	R171230	R171240
Width	8"	8"	8"
Height	21 1/2"	39 1/8"	49 3/4"
Depth	15"	15"	15"
Maintenance Clearance	23 3/4"	40 3/8"	51"
Capacity (lbs.)	15	30	40
Maximum Output Rate, Chlorine (lbs./hr.)	1.22	2.0	4.15
Maximum Pool Size, Chlorine (gal.)	97,600	160,000	332,000
Maximum Output Rate, Bromine (lbs./hr.)	0.57	1.15	1.73
Maximum Pool Size, Bromine (gal.)	20,200	40,900	61,600

Maximum working pressure — 50 psi

- Vent valve** bleeds air to ease lid removal.
- Safety lock-ring** spins off, freeing lid and providing easy access. Safety snap-lock provides secure seal.
- Screen and check ball** are easy to reach for cleaning if necessary.
- Flow-through circulation** creates maximum output of sanitized water.
- External dial control** for easy adjustment of flow rate.
- Drain valve** makes it easy to drain feeder for safe recharging and winterizing.
- Unions** are included for easy installation.
