EasyTouch™ Pool and Spa Control System

We Make Automation Simple

Enjoy your Pool and Spa the **EasyTouch™** Way

The EasyTouch Automated Control system is the world's easiest to use pool and spa control system. Its pushbutton simplicity and remote control options let you enjoy your backyard playground without the inconvenience of repeated trips to equipment pad, memorizing operating sequences, opening and closing valves, and resetting time clocks and thermostats. Just touch a button to control the desired function. It's that easy and convenient.

Relax. Everything's under Control with EasyTouch.

Designed for pool/spa combinations that share a common filtration and heating system, the EasyTouch gives you simple pushbutton control of pool and spa functions.

At the touch of a button, the EasyTouch rotates motorized valves from pool mode to spa mode, turns on the spa filtration, and fires up the heater to bring the spa up to the pre-selected temperature. EasyTouch does all the work, while you relax in the soothing comfort of your spa. When you've finished enjoying your spa, simply press a single button to switch the pump and heater back to pool mode.

Control pool or spa lights, including SAm™ and SAL™ automated color lighting, the convenient way—with EasyTouch.

The EasyTouch base system includes:

- Power center with filter pump time clock, and control of three auxiliary circuits (e.g., pool lights, spa lights, jets)
- Two valve actuators for automatic switching between pool and spa mode

Additional options include:

- Pool cleaner time clock for setting automatic cleaning cycles
- Auxiliary freeze sensor runs your pump during freezing conditions

Choose the remote that's right for you

You can combine the base system with one, two, or all three of these control options

Option A.

Four function hand-held wireless remote with up to 150' range

Option B.

Four function spa-side control

Option C.

Indoor-mounted control panel with water temperature display for added convenience

Pentair Makes It. That Makes It Simple.

With more than 25 years of experience in providing pool and spa owners with the latest technology in automated controls, Pentair designed EasyTouch with the utmost of operational ease in mind. The control system offers one button per task simplicity—with no complicated programming sequences to memorize. Thanks to its convenient portability, it is easy for anyone to properly operate a pool and spa from inside the home, at the spa, or just about anywhere around the backyard. Now is the time to add EasyTouch, the world's easiest to use pool and spa control system.
